Tested Experience: (Adapted from Lake Michigan College¹)

Evaluation of earned academic credentials is the primary method for determining faculty qualifications. However, other credentials may be considered for specific disciplines, particularly applied and practice-oriented disciplines. The value of tested experience to determine faculty qualifications is largely dependent upon the relevance of the experience both to the degree level and to the specific content of the course(s). Tested experience implies that some *objective* measure ensures that the individual's knowledge and expertise are sufficient for determining what students must learn and have learned.

Faculty members may have a breadth and depth of experience outside of the classroom in real-world situations relevant to the discipline in which the faculty member teaches that clearly contribute to student learning outcomes and can be considered in lieu of formal academic preparation. In such cases, the faculty member may present objective documentation of those experiences relevant to the teaching assignment to be considered for determining if the faculty member is qualified under tested experience guidelines. Using tested experience as a method for qualifying teaching faculty should be used judiciously and should not be construed as standard practice. Tested experience guidelines presented herein will be applied consistently.

Tested Experience Guidelines

1. A minimum of an associate degree is required for all teaching faculty. Some disciplines/programs may require a minimum of a bachelor's degree.
2. Teaching experience does not equate to tested experience.
3. Alternative credentials must be directly relevant to the course(s) to be taught.
4. A minimum of the equivalent of five years of full-time professional experience relevant to the specific content and learning outcomes of the course(s) for which the individual is being reviewed is required.
5. Alternative credentials documentation that may be considered include:
 1. Board or licensure exams
 2. Industry certifications
 3. Industry training records
 4. Department of Labor recognized apprenticeships
 5. Recognition in journals or textbooks
 6. Professional presentations
 7. Professional registries
 8. Publications, other than through vanity presses
 9. Honors, awards, and/or commendations directly related to the discipline

¹ Lake Michigan College. (2018). Faculty Qualifications. Retrieved from <https://www.lakemichigancollege.edu/policies/faculty-qualifications>

10. Letters of support from past and current employers or colleagues on business stationery that speak directly to work in the discipline
11. Other discipline-related documentation that demonstrates third-party recognition of the applicant's expertise in the field

Required Documentation:

Transcripts -

Transcripts of all college work required. (Unofficial transcripts or photocopies will be accepted to establish the application file. Official transcripts will be required if the candidate is offered the position.) All credits and degrees shall be earned from a regionally accredited institution and shall be documented with official transcripts sent directly from the institution to WV Northern's Human Resources Office. Credits and degrees from foreign institutions must be evaluated at the applicant's expense by an evaluation agency who is a member in good standing of the National Association of Credential Evaluation Services (www.naces.org) prior to first day of work.

Letters of Occupational Experience –

Must be written on official letterhead and be signed by an official representative of the employer. The letter must delineate length of employment (beginning and ending dates), brief description of job responsibilities, skill attainment, observed competence of duties and job requirements. Letters documenting teaching experience are to include subjects taught.

Licenses/Certificates –

Legible photocopies of all occupational licenses and/or certificates applicable to the area of instruction. Licensure must be current and issued by a state or national regulatory body.

Additional Requirements and Information:

The Vice President of Academic Affairs may approve exceptions to the minimum requirements for faculty in instances where an individual has acquired appropriate, documented alternative experience or education to instruct a particular field and the College has been unable to secure a faculty member with minimum credentials. The Vice President of Academic Affairs may approve employment of faculty with less than minimum credentials with a development plan to achieve the appropriate credentials within a set period of time.

Approval of appropriate qualifications by the Division Chairs shall be completed before any faculty member is allowed to begin instruction. However, a faculty member may be scheduled for instruction pending qualification by the first day of class.

Division Chairs will recommend adjunct faculty following "West Virginia Northern Community College procedures for hiring adjunct faculty."

All faculty must read, complete and sign the West Virginia Northern Community College employment application. In addition, all faculty must meet the following requirements:

1. The WVNCC qualification requirements outlined above. All degree(s) must have been obtained from a regionally accredited institution. The candidate must have earned a "C" or better in all relevant course work.
2. Have no felony convictions or misdemeanor originally designated as a felony convictions or an open-ended offense.
3. Have not held a license or credential (either professional or related to the field to be taught) issued by any state that has been revoked or suspended.
4. Have not been denied any certificate, license or credential (either professional or related to the field to be taught) by any state.
5. Have not been found guilty of unprofessional conduct.
