

EARLY ENTRANCE

Why early entrance?

Juniors and Seniors earn college credit while still in high school with potential of graduating simultaneously

Cost Savings - \$25.00 per credit hour through the summer following high school graduation

College and career readiness program available starting in the high school sophomore spring semester

College credit earned via:

- EDGE: High school courses approved by WVNCC for college credit
- DUAL CREDIT courses identified by each high school (varies)
- CONCURRENT ENROLLMENT: College-level courses are taken online and/or on campus with WVNCC faculty

Pathways to a Certificate or Degree

Guided pathways are created to assist high school students to understand certificate and associate-degree program requirements and the pathway to earn credit for all courses required.

Guided pathways are divided among the four meta-major areas identified at West Virginia Northern Community College. Each program's pathway identifies courses required.

High school sophomores may begin their journey in their spring semester with an online ORNT 101 College Transition course covering college preparation and career exploration. Advisors will work with high school counselors to guide students in selecting a meta-major pathway to follow.

High school juniors and seniors continue their journey by taking a combination of EDGE, Dual credit, and college courses simultaneously.

The goal of the Guided Pathways is to provide suggested course scheduling for high school students to either (1) complete a Certificate program while still in high school and / or (2) to complete the first year of an Associate in Applied Science degree.

In addition to the Programs identified in this Early Entrance Guide, West Virginia Northern also has Associate in Science and Associate in Arts degrees for students interested in taking General Education course with plans to transfer on to 4-year institutions.

Please refer to the WVNCC College Catalog at www.wvncc.edu for more details.

Program curricula are subject to change.

SOPHOMORES

Sophomores begin the journey with a ORNT 101 College Transition course in the Spring semester!

This online course includes information on transitioning from high school to college processes. An emphasis is placed on skills for college success as well as WVNCC programs and related careers with first-hand information from professionals in their fields.

JUNIORS

Juniors continue the journey by taking general education courses through WVNCC building credits toward a Certificate or Associate degree program and/or for transferring to a four-year college in the future. Some courses are offered specifically for each county/high school. However, students may also take other WVNCC courses.

Students must meet the same eligibility as college students based on placement scores and course prerequisites.

SENIORS

Seniors can be well on their way to completing a Certificate or Associate Degree at WVNCC. Seniors can take a combination of general education courses as well as some program courses.

Depending on the program, it can be possible to complete high school and a college program simultaneously.
